- **8. Marketing Scripts, Promotional Banners & Audio Voiceovers**
- **9. EAS Build CLI Commands & System Troubleshooting**

1. Executive Summary & Core Differentiators

Temsho is an open e-commerce mobile platform built for India, uniting artisans, local dukandars, home creators, and customers. Built around the core philosophy **'No Bot, Only Humans'**, Temsho eliminates AI bots, artificial manipulation, fake reviews, and intermediary fees.

Four Pillars of the Temsho Ecosystem:

- **100% Verified Humans:** Every buyer and seller is strictly verified via WhatsApp/SMS mobile OTP. Zero bot accounts.
- **0% Commission to Sellers:** Anyone can sell (dukaan ho ya na ho) with zero listing fees and zero commission cuts.
- **Direct P2P Money Flow:** Payments flow directly from buyer to seller via seller's own UPI ID or Cash on Delivery (COD). The platform does not hold seller funds.
- **Doorstep Courier Pickup & OTP Delivery:** Sellers dispatch directly from their registered address via Delhivery/BlueDart/Ekart. Parcels are securely handed over only upon entering the customer's 4-digit Delivery OTP.

2. Owner & Admin Master Control Guide

The application is equipped with an in-app Owner Administration Panel. When logging in with phone number **9044468663**, the **'Owner Admin Panel'** card automatically unlocks inside the Account tab.

Admin Tool	Functionality & In-App Control
Dynamic Coupon Generator	Create instant custom coupon codes (Flat ■ Off or % Discount with max cap and minimum order value). Manage or toggle active status anytime.
Dynamic Banner Manager	Create, toggle, and publish home screen promotional posters and marketing slides in real time without updating the APK.
Delivery Fee & Thresholds	Configure Standard Delivery Fee (■49), Local Express Fee (■29), and Free Delivery Threshold (e.g. ■499).
Live Broadcast Alerts	Send instant marketplace announcements and festival notifications to all active users.
Seller Moderation & Bans	Inspect all live listings, remove non-compliant items, or ban spam numbers with a single tap.
Privacy Guarantee	The owner's personal details (9044468663 / email) are strictly hidden from the buyer and seller UI for complete privacy.

3. Multi-Seller Model: 0% Commission & Doorstep Pickup

Temsho removes all barriers to entry for Indian sellers. Sellers require no GSTIN, no company registration, and no upfront fee to start selling.

Step-by-Step Seller Workflow:

1. **Instant Shop Launch:** Seller enters shop name, pickup street address, city, state, and 6-digit PIN code.
2. **Payment Setup:** Seller enters account holder name and personal UPI ID (GPay / PhonePe / Paytm / BHIM) + COD preference.
3. **Real Photo Listing:** Seller uploads genuine product photos directly from camera/gallery, enters selling price, MRP, category, and description.
4. **Cloud Marketplace Sync:** Product instantly syncs to Supabase cloud database and becomes visible to millions of buyers nationwide.
5. **Order & Doorstep Dispatch:** When an order is placed, courier partners arrive at the seller's pickup location, scan the AWB, and dispatch.

4. Delivery Partner Hub: QR Scan & OTP Verification

To eliminate delivery fraud, fake delivery status updates, and stolen parcels, Temsho integrates a dedicated **Delivery Partner Portal** with QR scanning and 4-digit customer OTP verification.

Delivery Verification Protocol:

- **Order QR Code:** Every order generates a secure QR code containing order code, customer name, delivery address, and encrypted token.
- **Rider Scanner:** Delivery executive taps 'Delivery Partner · Parcel QR & OTP' in Account tab, scans parcel QR code or enters order ID.
- **COD Cash Collection:** If the parcel is COD, the rider screen displays the exact cash amount to collect from the buyer.
- **4-Digit Customer OTP:** Recipient receives a unique 4-digit Delivery OTP upon order confirmation. The rider must enter this OTP to successfully mark the order as 'Delivered'.
- **Instant Settlement:** Upon OTP verification, delivery confirmation is broadcasted to both buyer and seller in real time.

5. Supabase Cloud Database Architecture

Temsho uses Supabase PostgreSQL for multi-device data persistence, live inventory sync, and instant notifications. The SQL schema is fully initialized with public row-level permissions.

Table	Key Columns & Schema Purpose
`users`	`id (uuid), phone (unique), name, email, city, state, pin, is_seller, is_owner`
`shops`	`id, owner_id (ref users), name, city, state, pin, pickup, upi, pay_name, accept_upi, accept_cod`

products	id, shop_id, seller_id, title, category, price, mrp, image_url, stock, is_live, rating
orders	id, code, buyer_id, seller_id, items (jsonb), total, pay_method, coupon, address, status, eta
app_settings	id (1), data (jsonb) -> appName, deliveryFee, freeDeliveryAbove, allowCod, allowUpi, maintenance

6. Shiprocket Logistics & Courier Integration

Temsho's logistics module connects seamlessly with Shiprocket's API, enabling automated courier assignment, doorstep pickups from seller addresses across India, and end-to-end AWB tracking.

Logistics Workflow:

1. **Multi-Location Pickup:** Every seller's pickup address is dynamically registered as a pickup warehouse via Shiprocket API.
2. **Rate & Serviceability Check:** Automated serviceability checks across 25+ top courier partners (Delhivery, BlueDart, Ekart, DTDC, India Post) to select optimal delivery time.
3. **AWB Generation:** Shipping label and barcode are generated with 1-click for seller parcel packaging.
4. **Rider Dispatch:** Courier partner rider is assigned to the seller's doorstep for package pickup.

7. App Store Publishing Guide

Store Platform	Publishing Steps & Console Details
PhonePe Indus Appstore *(Free Lifetime Account for Indian Devs)*	1. Go to https://developer.indusappstore.com and log in. 2. Click **'Create New App'** → Enter Name: **Temsho**. 3. Package Name: com.temsho.app. 4. Upload APK: Upload Temsho-v1.0.0.apk. 5. Upload App Icon (512x512) and Feature Graphic (1024x500). 6. Submit for Review (Approved within 24-48 hours).
Google Play Console	1. Generate Production AAB with: eas build -p android --profile production. 2. Log in to Google Play Console ($25 one-time developer registration). 3. Create App → Complete Data Safety form using PLAY-STORE-DATA-SAFETY.md. 4. Upload AAB to Production Track and submit for rollout.

8. Marketing Assets, Video Scripts & Audio Voiceovers

To acquire buyers and sellers rapidly across India, Temsho includes pre-produced AI promotional voiceovers and video ad prompt packages:

- **Full Seller Promotion Voiceover (MP3):** audio/seller-ad-voiceover.mp3 (~45s voiceover detailing 0% commission, direct UPI, and doorstep courier pickup).
- **Viral Instagram Reel / YouTube Short Voiceover (MP3):** audio/seller-reel-30sec.mp3 (~20s high-energy audio for social media ads).
- **AI Video Generator Prompts:** Complete scene-by-scene prompts in SELLER-VIDEO-PROMPTS.md compatible with Runway Gen-3, Kling, Sora, and Luma Dream Machine.
- **Marketing Banners:** 4 high-resolution banners created in banners/ (Launch, Seller Onboarding, Doorstep Delivery, and Play Store Feature Graphic).
